

# LEED & ENVIRONMENTAL STATEMENT

MARCH 2010

Conserving the planets resources is a shared mission at Bison Innovative Products. As an environmentally conscious company, we demonstrate this commitment in everything we do – from product design and manufacturing to packaging and delivery, to internal business operations. We are dedicated to providing products that are manufactured in an environmentally sensitive and efficient manner. Our focus is to create roof deck systems and green roof environments that not only are functional and beautiful, but help to support the environment.

## LEED POINTS

### Bison Massarunduba Wood Tiles

FSC Certified (SCS-COC-002585) Bison Massarunduba Wood Tiles could contribute to a LEED point under Materials and Resources Credit 7 (MR Credit 6 for CS).

### Bison Deck Supports

Bison Deck Supports could contribute to multiple points within Materials and Resources Credit 4, as a single product that contributes to multiple points.

## BISON DECK SUPPORTS

Versadjust

Level.It

ScrewJack

Bison Deck Supports product lines: Level.it, Versadjust and ScrewJack contain 20% Post-Industrial Recycled Material. Furthermore, Bison pedestals are 100% recyclable and **MADE IN THE U.S.A.**

## BISON WOOD TILES

Bison Wood Tiles utilize wood sources that have been harvested in an environmentally responsible method, designed to preserve and enhance the economic viability of rain forest hardwoods. Our preassembled wood tiles utilize two-foot slats so remnants from other manufacturers are used – furthering the efficient use of materials and reducing waste.

**Bison Massaranduba Wood Tiles** are certified by the Forest Stewardship Council (FSC), which is a third party entity that promotes responsible management of the world's forests. A FSC certification assures wood products have positive environmental attributes that are backed by a global system of verification.

**Bison Ipê Wood Tile** sources utilize a select cut method where only mature trees are harvested, leaving the vast majority of the forest intact. Not only does this method preserve the rain forest, it increases the value of the wood in the local economy and discourages the need to clear the forest for farming or ranching.
